

SHIVAM PAHUJA

Head of AI Analytics Capabilities | Enterprise Data, AI & Decision Intelligence

Lausanne, Switzerland | +41 79 364 4607 | shivam.pahuja.ee@gmail.com | linkedin.com/in/shivampahuja

PROFESSIONAL SUMMARY

Enterprise data and AI leader with over a decade of experience building decision-intelligence systems that shape how global organisations price, perform, and grow. Leads a multi-disciplinary organisation of 70+ — data scientists, engineers, product managers, and analytics consultants — building enterprise AI, agentic-AI, simulation, optimisation, and decision-intelligence capabilities for commercial decision-making. Trusted strategic partner to C-suite and senior commercial, finance, and operations leadership. Work has delivered ~CHF 6M+ in direct savings, ~75% reduction in enterprise decision-prep cycles, and shaped pricing, portfolio, and performance decisions across 50+ markets.

PROFESSIONAL EXPERIENCE

Head of AI Analytics Capabilities — *Philip Morris International, Lausanne, Switzerland* Apr 2026 – Present

Lead enterprise AI, simulation, optimisation, and agentic-AI workstreams powering commercial decision-making. Expanded scope covers marketing mix modelling (MMM), commercial models, integrated commercial planning, and the broader simulation-and-optimisation product portfolio. Strategic partner to C-suite on the operating model for AI inside the enterprise.

- Own the enterprise AI roadmap across decision-intelligence, agentic AI for autonomous commercial planning, ML-powered simulation, and optimisation engines.
- Lead a 70+ person global organisation across data science, engineering, product, and analytics consulting; partner directly with C-suite, regional, and market leadership.
- Drive the integration of GenAI and agentic AI into core commercial workflows — pricing, planning, performance, and portfolio.

Head, Commercial Engine Analytics — *Philip Morris International, Lausanne, Switzerland* 2024 – Apr 2026

Led the global Commercial Engine Analytics function — enterprise analytics products powering pricing, performance, and portfolio decisions across markets.

- Re-architected pricing from a single-market simulator into a global decision-intelligence platform — long-term prediction, optimisation across revenue / volume / share / margin trade-offs, lever recommendation, cross-market elasticity benchmarking, competitor response modelling, and a GenAI conversational layer. ~CHF 6M+ direct savings; ~75% cut in decision-prep cycles.
- Architected an AI-powered three-layer Enterprise Performance & Decision Platform — governed KPI backbone, ambient-agent early-warning system, and forward-looking scenario-planning and simulation. Repositioned executive reporting from passive dashboards into active decision systems.
- Delivered marketing effectiveness and causal impact frameworks, conversational analytics, growth-segmentation models, a multi-ecosystem commercial planning backbone, forward-looking performance prediction, and portfolio intelligence surfacing white-space opportunities.

Omnichannel Data Analytics Manager — *Philip Morris International, Lausanne, Switzerland* Aug 2020 – 2024

Led omnichannel measurement and insights for a flagship global product portfolio launch — setting KPIs, acquisition and retention targets across markets, and shaping the launch strategy with data-driven recommendations. Shipped a taste-profile portfolio recommender deployed in 50+ markets. Two internal awards — measurement framework setup, and behavioural Normalcy Index modelling pandemic-era patterns.

Data Scientist, Headquarters — *Philip Morris International, Lausanne, Switzerland* Aug 2019 – Aug 2020

Established a one-stop-shop for company-wide KPI measurement and root-cause analytics. Built attribution models and operational analytics across 50+ countries. Quantitative cost-and-revenue model defining digital strategy across 50+ countries — ~\$70M in value identified. Lifted NPS by +5.2 pts via consumer-360 segmentation.

Enterprise / Associate Data Scientist — *Philip Morris International, Tokyo, Japan* Mar 2018 – Aug 2019

Voice of Consumer (Most Innovative Project; presented to CEO & COO): supervised ML pipelines for topic and sentiment, plus an end-to-end social-to-insights tool and global command-centre strategy. Fraud-prevention engine (East Asia, ~\$25M savings); pricing-recommendation model (Australia, ~\$30M in data-driven pricing decisions); out-of-stock-prevention (Malaysia, ~\$12M projected losses prevented).

Data Science Engineer — *Rakuten, Tokyo, Japan*

Jan 2017 – Mar 2018

Most Valuable Data Product, Rakuten 2017. Built ML models, scalable pipelines, and APIs for personalised targeting, A/B testing with bandit optimisation, and recommendation systems across 100M+ consumers — lifting conversion +4%.

Data Science Engineer & Lead — *Hikari Tsushin Inc., Tokyo, Japan*

Nov 2014 – Dec 2016

Built consumer-propensity models (+8% conversion). Led a team of 7 on the data warehouse and BI integration; established ETL best practices and self-served datasets, saving ~JPY 20M.

Big Data Developer (Internship) — *Times Internet Limited, India*

Jun 2013 – Nov 2013

Rule-based user-profiling system for 50M+ consumers; scalable newsletter mailing service with user-interaction tracking.

EDUCATION

Bachelor of Engineering, Electronics & Communication — Delhi College of Engineering, India | Aug 2010 – Aug 2014

CORE SKILLS

Leadership: Enterprise AI Strategy, Multi-disciplinary Team Leadership (70+), C-Suite Stakeholder Management, Strategic Partnership, Operating Model Design, Talent Development, Executive Communication, Global Programme Leadership

AI & Analytics: Generative AI, Agentic AI, AI Transformation, Machine Learning, Large Language Models, Marketing Mix Modelling (MMM), Simulation, Optimisation, Causal Inference, Forecasting, Decision Intelligence, Advanced Analytics, MLOps, Semantic Layers, Data Governance

Product & Domain: Product Management, Enterprise Data Products, Pricing Strategy, Commercial Strategy, Portfolio Strategy, Marketing Effectiveness, Integrated Commercial Planning, Voice of Customer

Technical: Python, SQL, Snowflake, dbt, AWS, Docker, Airflow, Power BI, Tableau, Datorama, Git, scikit-learn, XGBoost

CERTIFICATIONS & RECOGNITIONS

Certifications: Google Advanced Data Analytics • Certified Scrum Developer • Oracle Certified Associate (Java & SQL) • DataCamp: Data Analysis, Statistical Inference & Machine Learning • Japanese Language Proficiency Test.

Awards: Most Valuable Data Product, Rakuten (2017) • Most Innovative Project, presented to CEO & COO (2018) • Two internal awards for enterprise measurement framework and behavioural Normalcy Index modelling (2020–21).

LANGUAGES

English (Bilingual) • Hindi (Native) • French (Limited working) • Japanese (Conversational)
